

MorningDOSE

From 9AM – 12PM every Sunday

Includes Bass SPEX, Karabo and Nadine

The show is filled with all out nonsense from left to right. Starting off in 2015 with just Bass, the show set itself to explore the world of entertainment and humour at its best. Every week includes laughter, insults and too many apologies for what is said on air. Thabo aka Bass SPEX is set as the presenter and man of the show with Karabo acting as co-host and Nadine as the resident news anchor. We have such features as ChillingWithTheReps which includes multiple SRC members on air talking about anything involving students and themselves alike. The show isn't just three hours of talk and music, it's more of three people trying to get to their heads on what else could be said about everything.
