This Honours Guide should be read in conjunction with the *Guide to Psychology*, available on the website of the Department of Psychology (www.ufs.ac.za/psy) or at the Psychology Information Office (Psychology Building, Room 5).
NATURE OF THE PROGRAMME

The Honours Programme at the Department of Psychology offers students in-depth theoretical understanding of Psychology as a discipline, the opportunity to conduct a research project, as well as practical exposure to community engagement and service-learning activities.

After completion of the Honours Programme, students can apply for admission (subject to selection) to postgraduate training in professional psychology (Master’s in Applied Psychology-Clinical or Counselling psychology) or academic psychology (Master’s in Research by dissertation).

The duration of the programme is one academic year for full-time students or two academic years for part-time students. The late afternoon classes (for especially part-time students) commence at 16:00. Students who want to complete the programme in more than two years will have to apply for special permission.

Certain modules are offered during the day and others during late afternoon. Day and late afternoon modules rotate annually. Full-time students are expected to attend both the day and late afternoon classes. All students are expected to attend contact sessions or lectures on a weekly basis (the programme is not presented via distance learning).

Most modules involve one three-hour contact session per week. For certain modules, practical opportunities and service-learning activities will be scheduled as well. At the commencement of each module, the lecturer will provide an outline of the module.

The contact sessions or lectures for this programme will only be in English.

Please note: All learning and study guides and assessment activities will only be in English.
AIMS OF THE HONOURS PROGRAMME

The honours programme aims to equip students with the ability to:

- apply quantitative and qualitative research principles, methodological tools and practical skills to competently plan (create), conduct and report on a research project of limited scope in the field of psychological research;
- plan, conduct and evaluate a psychosocial intervention regarding specific contemporary psychosocial issues in a community setting;
- apply in-depth theoretical learning of normal human development throughout the lifespan to real-life situations;
- use critical and creative thinking to discuss, apply and critically evaluate various approaches to psychotherapy;
- portray an ethical sensitivity toward a variety of therapeutic situations;
- demonstrate understanding, knowledge and skill in the psychological assessment process of administering, scoring and interpreting of selected psychological measuring instruments in an ethical and professional way; and
- demonstrate an integrative understanding of (and theoretical approaches to) psychopathology during childhood, adolescence and adulthood.
ADMISSION/SELECTION PROCEDURES

Selection for the Honours Programme in Psychology at the UFS is highly competitive. Due to the high standards required for academic and professional development, the labour intensity of the programme, as well as limited staff and limited resources (such as psychometric instruments), only a limited number of students can be accommodated. Each year we receive many more applicants than we can accommodate; thus, only the top academic candidates will be selected. Not being selected in a particular year does not necessarily imply that a candidate is unworthy of a place in the programme, but that the unsuccessful candidate was outperformed by candidates with higher academic performance.

A (any) degree with Psychology as a major subject is a prerequisite for application for admission into the Honours Programme. This implies that the applicant must have completed all the first-, second- and third-year modules stipulated in the curriculum for Psychology as a major subject.

**Academic performance:** Academic performance in all undergraduate Psychology modules will be the principle selection criterion. To ensure a fair basis of comparison, no other marks will be taken into account; also no other aspects such as age, work experience, personal circumstances or other qualifications (apart from Psychology modules) will be considered. Since selection takes place during October, only the module marks that are available at the time of selection will be considered.

**Equity:** In accordance with the UFS policy on equity and access, the selection committee will deliberately seek to ensure that the class will reflect the diversity of talent available in the country. Preference will be given to the students of the University of the Free State. Prospective students must acquaint themselves with the departmental information and application form, which is available on our website www.ufs.ac.za/psy.

The closing date for applications is the end of September of the year preceding intended study. No late or incomplete applications will be considered. All applications have to be done online and electronically submitted. See the Departmental and UFS website. Please note that new candidates will be admitted only at the beginning of each academic year. No new students will be admitted during the second semester.
CONTENT: HONOURS PROGRAMME 2020

The curriculum consists of the following compulsory modules:

Year modules

- PSHA6804 Psychological Assessment  Presented in late afternoon (Wednesdays)
- PSHC6804 Community and Social Psychology  Presented in mornings (Thursday and Tuesday))
- PSHM6804 Advanced Research Methodology  Presented in late afternoon (Mondays)
- PSHR6808 Applied Research Methodology  Presented in late afternoon (Tuesdays)

First-semster modules

- PSHD6814 Advanced Developmental Psychology  Presented in morning (Mondays)
- PSHT6814 Advanced Psychotherapy and Ethics  Presented in mornings (Tuesdays)

Second-semster modules

- PSHP6824 Advanced Psychopathology  Presented in morning (Thursdays)
# MODULE OUTLINE

## Year modules

<table>
<thead>
<tr>
<th>CODE</th>
<th>NAME OF MODULE</th>
<th>NQF level</th>

</table>
| PSHA 6804 | Psychological Assessment: The aim of this module is to equip the student with advance knowledge of and skills in the ethical and professional conducting, value allocation, and limited interpretation of selected psychological measuring instruments. The following assessment domains are covered: visual-motor integration, intelligence, interest, aptitude, and personality.  
- **Module coordinator:** Dr Neo Pule  
  Tel: +27 51 401 9314 or pulent@ufs.ac.za | 8         | 16      |
| PSHC 6804 | Community and Social Psychology: The aim of this module is to equip students with the theoretical underpinnings and analytic skills relating to community psychology in order to plan, conduct and evaluate a psychosocial intervention regarding specific contemporary psychosocial issues.  
- **Module coordinator:** Prof Paul Fouché, SG 108 A,  
  Tel: +27 51 401 3800 or +27 51 401 9314 fouchejp@ufs.ac.za | 8         | 16      |
### Advanced Research Methodology
This module aims to provide students with advanced knowledge regarding research methodology and methods in the social and behavioural sciences. Quantitative and qualitative approaches within the main umbrella paradigms and philosophical underpinnings that guide research will be addressed. Students will have to be able to select an appropriate paradigm and research design and coherently apply different advanced methodologies/techniques in the field of psychological research.

Module coordinators: Dr P Naidoo, SG 104
Tel: +27 51 401 2340 or naaidop@ufs.ac.za

### Applied Research Methodology
The aim of this module is to provide students with knowledge to understand the underlying principles of research. Furthermore, students will be equipped with the practical skills and methodological tools to competently plan, conduct and report on the research process.

- Module coordinators: Dr P Naidoo, SG 104
  Tel: +27 51 401 2340 or naaidop@ufs.ac.za

### First semester

**Advanced Psychotherapy and Ethics:** This module aims at equipping students with the competence to practice psychology professionally and ethically. It provides students with knowledge and skills regarding psychotherapeutic approaches and ethical practices in order to know how responsible counsellors, psychometrists and psychologists should act. Students are also encouraged to think critically about themselves as future therapists and the services they intend to provide to future clients, as well as to effectively evaluate the suitability of various approaches to psychotherapy.

- **Module coordinator:** Prof L. Naudé, SG 111, Tel: +27 51 401 2189 or naudel@ufs.ac.za
