From the Dean's office

Prof. Herman van Schalkwyk.

The Faculty of Natural and Agricultural Sciences at the University of the Free State (UFS) leads the way in the practising of natural and agricultural sciences in South Africa and the highest levels of quality and credibility are reflected.

Our commitment, however, reaches far beyond just this. It reaches beyond the borders of the country and across continents; its multi-disciplinary and practical approach is vested in all the disciplines presented by the faculty.

In 2005/06 the Faculty experienced significant growth in measurable outputs. A contributing factor was the comprehensive apparatus strategy and plan which was implemented in 2005. With this strategy, university funds were used to leverage other funds in order to obtain huge discounts from suppliers of apparatus. In this way the faculty managed to obtain almost R50 million worth of apparatus in 2005.

The strategy was continued in 2006 when an agreement to the value of R7 542 531 was reached with Shimadzu, according to which apparatus was supplied to the faculty at discount prices. The agreement, which is valid for three years, entails the free replacement of apparatus which is purchased during this period with upgraded versions.

The new apparatus forms part of the UFS vision to compete internationally with quality research outputs in certain niche areas, to provide leadership in advanced training to students from the African continent and to establish the university as a leader among South African universities.

Two researchers with a B rating from the National Research Foundation (NRF) were also appointed. Both of these initiatives bore fruit and in 2006 the faculty increased its total research outputs by

about 13%. As an example, the Department of Chemistry's outputs increased by 100%.

The faculty has been bursting at the seams over the past couple of years. Student figures rose from 3 935 undergraduate, postgraduate and occasional students in 2005, to 4 224 in 2006. There is also strong representivity of students from other African countries and in 2005/06 almost 600 students studied at the faculty.

An extended B.Sc. programme has been presented to students since 2005. The programme aims at providing students who do not comply with all the requirements for the B.Sc. programme with the necessary sub-structure to complete the B.Sc. degree successfully. A preliminary evaluation of the results indicates that the programme is delivering the desired results.

The alignment of the Qwaqwa Campus, which was incorporated into the UFS in January 2003, remains a challenge. Regular discussions are held with staff on the campus in order to make the faculty's programmes more sustainable and to align it with the broader strategic plan of the UFS.

On a national level, the faculty is in the process of making its mark in terms of teaching and community service. In 2005 the faculty again actively began utilising its

experimental farms. A three-way agreement between the UFS, the National Farmers Union (NAFU) and the Mangaung Local Municipality led to the establishment of the Lengau Agricultural Development Centre on the Sydenham Experimental Farm. The centre provides training and mentorship to small-scale upcoming farmers.

To be dynamic and progressive requires innovative thinking. It requires commitment and a desire to deliver excellent teaching and learning opportunities to students. It requires a willingness to form partnerships, and a multi-disciplinary and practical approach to the tertiary education environment in South Africa.

This report covers the faculty's activities in 2005/06. It is a reflection of two years' commitment on the part of a team of skilled and motivated academics and support staff.

Prof. Herman van Schalkwyk

Dean: Faculty of Natural and Agricultural Sciences
University of the Free State

Disaster Management Training and Education Centre for Africa (DiMTEC)

“With our experience in Flood Risk Management, we now offer an opportunity to prospective students to share in this knowledge.”

Mr Andries Jordaan.

Overview

Prior to 2006 the Disaster Management Training and Education Centre for Africa (DiMTEC) formed part of the Department of Agricultural Economics. In 2006, for the first time, the centre began operating on its own, independent of the department. The popularity of the master's course exceeded all expectations, with student numbers increasing from only 9 in 2002 to 35 in 2006. In 2006, 60 students enrolled, of which 21 students were from countries other than South Africa.

The centre managed to secure a bursary scheme to the amount of R2,3 million for disaster management students. This bursary scheme is funded by the Department of Science and Technology (DST) and it enables students to gain experience in disaster management in different government departments while completing their studies.

The centre presented a number of short courses on Sphere Project and Minimum Standards in Disaster Response, Overview of Disaster Management and Political Strategic Planning. Most of the courses were presented in Bloemfontein, and one of the courses was presented in Bulawayo, Zimbabwe. The 242 attendants included South Africans, Zimbabweans and even a resident of Nigeria. The centre was also involved in projects such as the Disaster Risk Assessment for Eden Municipality in the Eastern Cape and the Free State Disaster Management Framework.

Students from the centre presented exhibitions at the annual conference of the Disaster Management Institute of South Africa. Mr Jordaan attended and contributed to the panel discussion of the Disaster Management Seminar: Towards a Resilient Southern Africa: Strategic Leadership Issues in Disaster Management, which was held in Cape Town.

Mr Jordaan also attended and contributed to the expert panel discussion on a workshop of the Lesotho Wool and Mohair Industry in Maseru, Lesotho.

A group of delegates attending a course that was conducted in Zimbabwe. The delegates are from non-government organisations, churches, the United Nations and community organisations.

Mr Andries Jordaan (middle), Director of DiMTEC, with some of the date farmers in Sudan. Here they are sitting on the banks of the Nile River, 300 km's north of Khartoum near the Merowe Dam. Mr Jordaan was doing financial impact studies for the Merowe Dam resettlement project.

The centre is represented on both provincial and national committees. Mr Andries Jordaan, Director of the centre, serves on the South African Qualifications Authority (SAQA) Scoping Team for Disaster Management Training in South Africa as well as the Free State Disaster Management Advisory Forum.
