

Jun 2001: Arrival of equipment for Boyden refurbishment
Jun 2001: Aankoms van toerusting vir Boyden opgradeering

The equipment to begin the refurbishment of the 1,5 m telescope at Boyden arrived from the USA at Boyden Observatory on 29th May 2001. What an exciting moment!

The long-awaited equipment arrives in a truck at Boyden observatory.

Three excited people pose with the box. (From left, Hannes Calitz, Dr Matie Hoffman and Dr Pieter Meintjes).

Dr Meintjes signs the forms.

The box is hoisted up...

...and into the telescope dome.

It has finally arrived!

Mr Hannes Calitz looks on with excitement.

Look at those smiles.
