BMedSc (Radiation Sciences)

1. PREMISES

PLEASE NOTE: ADMISSION IS SUBJECT TO SELECTION

The present selection policy can be summarised as follows:

(a) Any candidate can apply for admission to the first year of the B.Med.Sc. (Radiation Sciences) programme (i.e. Grade 12 learners, school leavers, graduates and diplomates, and people who are already studying for a degree).

(b) A holistic approach is important in the selection process, which is based on a points system that includes academic achievement, National Benchmark Test (NBT), cultural activities and sport.

(c) A definite effort is made to accommodate candidates from a disadvantaged academic background who demonstrate the necessary potential and a reasonable ability to attain success in their course.

(d) It is acknowledged that students are national assets, but students from certain areas in South Africa are regarded as the main responsibility of the UFS for possible selection.

(e)   A number of students would be selected according to the Health Professions Council's allowed intern intake numbers. (including students from SADC countries*)

(f) Mainly South African students are selected for studies in the medical sciences due to limited spaces available and the high costs involved in the training of such students. Students who apply for B.Med.Sc. (Radiation Sciences) are excluded from the agreement of the Department of Health with medical schools.

(g) The medical reports of applicants who have been selected for the B.Med.Sc. (Radiation Sciences) programme will be provided to the Selection Committee to determine whether there are students with such disabilities that would make them unfit for studies in Radiation Sciences.

(h) At its own discretion, the Faculty reserves the right to require immunisation against diseases from time to time before admitting students to any further academic year or semester during their studies. As far as the B.Med.Sc (Radiation Sciences) programme is concerned, immunisation against Hepatitis B will occur during training and it is therefore not necessary to be immunised beforehand.

(i) The Faculty follows the guidelines for immunisation as contained in the latest approved official policy document. The full policy document is available at Undergraduate Student Administration, Faculty of Health Sciences.

1. BEPALINGS

LET WEL: TOELATING IS AAN KEURING ONDERHEWIG

Die huidige keurbeleid kan soos volg opgesom word:

(a) Enige kandidaat kan aansoek doen om toelating tot die eerste jaar van die B.Med.Sc. (Stralingswetenskappe)-program (d.w.s. Graad 12-leerders, skoolverlaters, graduandi en diplomandi, en persone wat reeds met 'n graad besig is).

(b) 'n Holistiese benadering is belangrik in die keuringsproses, wat op 'n puntesisteem gebaseer is wat akademiese prestasie, Nasionale Normtoets (NNT), kulturele aktiwiteite en sport insluit.

(c) Daar word 'n besliste poging aangewend om kandidate met 'n agtergestelde akademiese agtergrond, wat die nodige potensiaal en 'n redelike vermoë toon om sukses in hul kursus te behaal, te akkommodeer.

(d) Daar word erken dat studente 'n nasionale aanwins is, maar studente vanaf sekere gebiede in Suid-Afrika word as die grootste verantwoordelikheid van die UV vir moontlike keuring beskou.

(e) 'n Aantal studente volgens die Mediese Raad se toegelate inname getalle sal gekeur word. (studente van SAOG-lande* ingesluit)

(f) Hoofsaaklik Suid-Afrikaanse studente word vir studie in die geneeskundige wetenskappe gekeur weens die hoë koste wat aan die opleiding van sodanige studente verbonde is. Studente wat aansoek doen vir B.Med.Sc. (Stralingswetenskappe) is uitgesluit van die ooreenkoms wat die Departement van Gesondheid met Mediese Skole aangegaan het.

(g) Die mediese verslae van aansoekers wat vir die B.Med.Sc. (Stralingswetenskappe) program gekeur is, sal aan die Keurkomitee voorsien word om vas te stel of daar studente is met sodanige gestremdhede wat hulle ongeskik maak vir Stralingswetenskappe studie.

(h) Die Fakulteit behou die reg voor om van tyd tot tyd immunisering teen siektetoestande volgens eie diskresie te vereis alvorens die student tot enige akademiese jaar of semester gedurende hul studies toegelaat word. Wat die B.Med.Sc. (Stralingswetenskappe) program aanbetref, sal immunisering teen Hepatitis B tydens mediese opleiding plaasvind en is dit dus nie nodig dat die student vooraf immunisering ondergaan nie

(i) Die Fakulteit volg die riglyne vir immunisering soos vervat in die nuutste goedgekeurde amptelike beleidsdokument. Die volledige beleidsdokument is beskikbaar by Voorgraadse Studente-Administrasie, Fakulteit Gesondheidswetenskappe.

(j) All students must be aware that if their HIV status is positive, before taking up the selected places that they will be exposed to patients with infective diseases, which might affect their illness. In these cases, it will be the students' responsibility to take the necessary precautions to prevent illness due to their positive status and exposure. All students will be expected to fulfil all the rotation requirements for the programme.

In sulke gevalle sal dit die student se verantwoordelikheid wees om voorsorgmaatreëls te tref om siekte weens hul positiewe status en blootstelling te voorkom. Daar sal van alle studente verwag word om aan alle rotasievereistes van die program te voldoen.
