*** If you do not received the postgraduate quote, please contact Student Academic Services in the George du Toit Building to change your student profile on PeopleSoft**

Tips for Internet use

- Keep your password secret.**
- Change your password regularly. Use a random mixture of at least seven characters, including upper- and lowercase letters, numbers and symbols.**
- Do not make use of the “Save my password” option.**
- Shut down the computer after use, especially after using a computer in a computer lab.**

Very important

- A student will not be refunded for wrongful use of his/her Internet account, since access is regulated with a username and password.**
- Monitor your Internet use on the Self Service section available on <https://www.ufs.ac.za/kovsielife/login-page>**
- Please take cognisance of the fact that for a browser to display a page, it must download the entire page.**
- Therefore, in the web environment download is not limited to instances where the user has made use of the “Save” command.**
