

HOW DOES IT WORK?

UNLIMITED SERVICE

- In this instance the user (student) will connect to the UFS website as normal using a 3G device, Wi-Fi or ASDL network provided by their ISP participating in this service. The <http://www.ufs.ac.za> and <https://learn.ufs.ac.za> access points to academic content and student support services will be provided at a zero rate to the user (student) by their respective participating ISP. Also take note of the limitations already mentioned
- However, be aware that any link accessed via the Home page or other hosted pages that link to any address outside the UFS Domain, as well as any Icon linked to social media or any other backend application which is not hosted by the UFS (BB Collaborate, Turnitin and other) might incur cost to the user (student).
- The student can at any stage switch to the UFS Limited Service option by following the procedures as described below should there data expire.

UFS LIMITED SERVICE

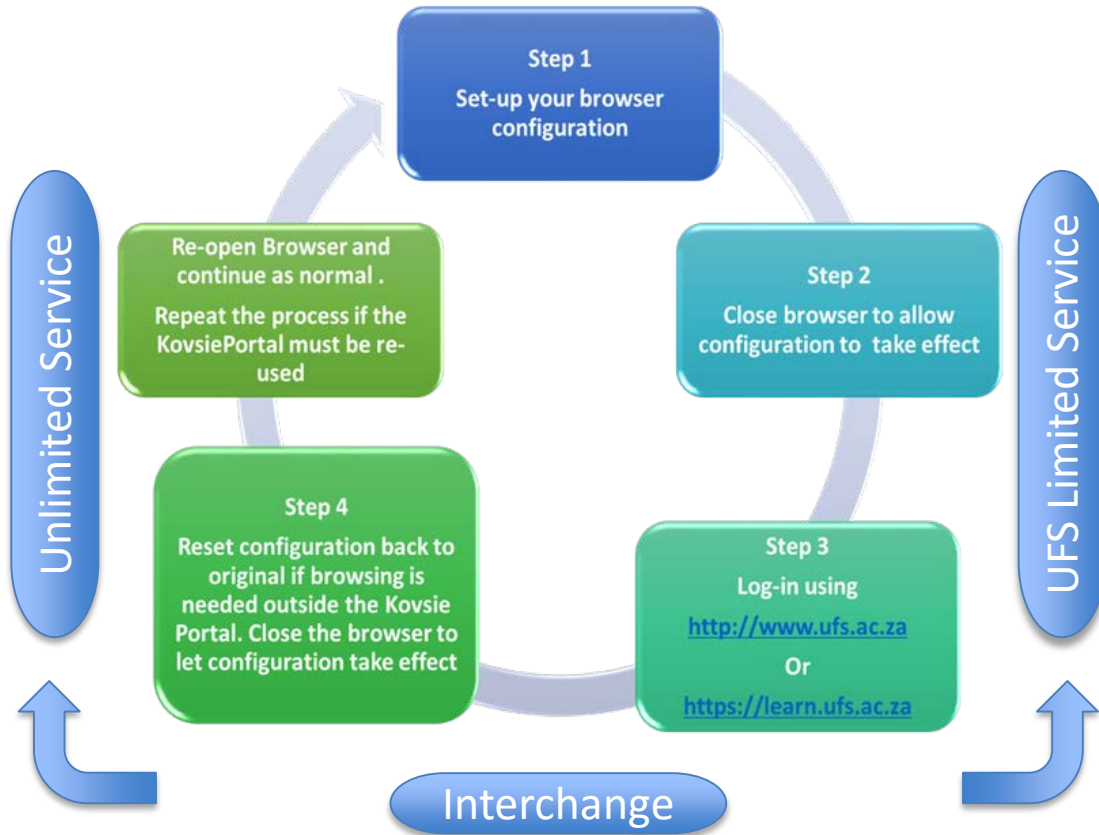

As mentioned the UFS Limited Service have the following characteristics:

- Zero rated data access point <http://www.ufs.ac.za> and <https://learn.ufs.ac.za>
- Utilize a KovsiePortal and the browser used must be configured before the Kovsie portal can be accessed
- Only UFS hosted academic content and **selected non UFS academic** related links are unblocked
- YouTube and all Social Media are blocked
- High possibility of operating at a lower bandwidth (Internet speed)
- Work within the UFS managed internet environment
- Subjected to the limitations already discussed.
- Needs manual configuration (setting up) of your internet browser before the KovsiePortal can be activated. Once the KovsiePortal is activated access is granted to the UFS Internet platform and access to all UFS academic content and limited non UFS content. Bear in mind once the portal is accessed YouTube and Social Media as well as normal browsing is blocked.
