

Centre For Graduate Support

Applications, Admissions & Enrolments (AAE)

Inspiring excellence, transforming lives through quality, impact, and care.

Who we are:

The Centre for Graduate Support has established the **Applications, Admissions & Enrolments (AAE) Portfolio** to support master's and doctoral students within the UFS University community. This division offers comprehensive services and information resources to achieve our postgraduate teaching, learning, research, and community objectives.

The AAE Portfolio is responsible for managing the application, admission, and enrolment processes for master's and doctoral programs across most faculties, except for the Faculty of Health Sciences and the Business School on both the Bloemfontein and QwaQwa campuses.

Our dedicated team ensures that each step, from the initial application to the final enrolment, is handled with the utmost efficiency and support. In addition to these services, we offer extensive registration support to faculties, assisting them in seamlessly executing actual registrations.

Through these efforts, we aim to enhance the postgraduate experience and foster academic excellence within our University community.
