

SAMRC Science Colloquium – Integrated Care Models: The Answer to Early Cancer Diagnosis

The SAMRC Science Colloquium will take place tomorrow, 27 November 2025. Please note that there is an option to join online – see details below.

Africa bears a disproportionately higher burden of cancer than the rest of the globe due to its rapidly growing population, underdeveloped health-care systems, and limited research in addressing cancer care. Integrated care models present a transformative approach to providing a solution by enabling early diagnosis, timely referral, and treatment for patients.

About the speaker:

Dr Mutura Wanja (MB ChB, MMed [Radonc], MSc Epidemiology and Biostatistics – Continuing)

Dr Mutura Wanja is a dedicated oncologist and early career researcher based in Kenya. Her work centres on delivering high-quality cancer care grounded in evidence-based medicine and robust good clinical practice principles. She has a strong commitment to integrating palliative care into oncology practice to ensure holistic patient support. Her research interests include melanoma, sarcoma, cervical cancer, and the use of research to influence policy and improve health systems.

Venue: Pretoria Boardroom

Date: Thursday 27 November 2025

Time: 09:00-10:00
