(4) (a) Where the patent for the main invention is surrendered, revoked, refused or abandoned, the patent of addition shall, unless the commissioner or the registrar otherwise directs, become an independent patent and the normal term of such independent patent shall not extend beyond the date on which the patent for the main invention would have expired if it had not been surrendered, revoked, refused or abandoned.

manner.

(3) (a) Any person may oppose such application for amendment within the prescribed time and in the prescribed manner.

CHAPTER VIII LICENCES

53. Licences of right.—(1) At any time after the date of the sealing of a patent, the patentee may apply to the registrar for the patent to be endorsed with the words “licences of right” and where such an application is made the registrar shall, if satisfied that the patentee is not precluded by contract from granting licences under the patent, cause the patent to be endorsed accordingly.

(2) Where a patent has been endorsed under this section—

- (a) any person shall at any time thereafter be entitled as of right to a licence under the patent upon such conditions as may, in default of agreement, be decided by the commissioner on the application of the patentee or the person requiring the licence;
- (b) the commissioner may, on the application of the holder of any licence granted under the patent before the endorsement, order such licence to be replaced by a licence to be granted by virtue of the endorsement on conditions to be decided by the commissioner;
- (c) no interdict shall, in proceedings for infringement of the patent (otherwise than by the importation of goods) be granted against the defendant if he undertakes to take a licence upon conditions to be decided by the commissioner, and the amount, if any, recoverable from the defendant by way of damages shall in such case not exceed double the amount which would have been payable by him as licensee if such a licence had been granted before the earliest infringement;
- (d) the renewal fee payable in respect of the patent after the date of the endorsement shall be one half of the renewal fee which would have been payable if the patent had not been so endorsed.

(3) The licensee under a licence granted by virtue of the endorsement of a patent in terms of this section may (unless in the case of a licence whereof the conditions are decided by agreement, the licence otherwise expressly provides) call upon the patentee to institute proceedings in respect of any infringement of the patent, and if the patentee fails to do so within two months after being so called upon, the licensee may institute proceedings for the infringement in his own name as if he were patentee, joining the patentee as a defendant.

(4) A patentee so joined as a defendant shall not be liable for any costs unless he enters an appearance and takes part in the proceedings.

(5) An application for the endorsement of a patent in terms of this section shall contain a statement, to be verified in such manner as may be prescribed, that the patentee is not precluded by contract from granting licences under the patent, and the registrar may require from the applicant such further evidence as he may think necessary.

(6) An application under this section for the endorsement of a patent of addition shall be dealt with as an application for the endorsement of the patent for the main invention also, and an application made under this section for the endorsement of a patent in respect of which a patent of addition is in force, shall be dealt with as an application for the endorsement of the patent of addition also, and where a patent of addition is granted in respect of a patent already endorsed under this section, the patent of addition shall also be so endorsed.

(7) Every endorsement of a patent in terms of this section shall be recorded in the register and shall be advertised in the journal and in such other manner as the registrar may direct, to bring the endorsement to the notice of interested persons.

54. Cancellation of endorsement on patent.—(1) At any time after a patent has been endorsed in terms of [section 53](#), the patentee may apply to the registrar for the cancellation of the endorsement.

(2) Where such an application is made and the balance paid of all renewal fees which would have been payable if the patent had not been endorsed, the registrar may, if he is satisfied that there is no existing licence under the patent or that all licensees under the patent consent to the cancellation, cancel the endorsement.

(3) Within the prescribed period after a patent has been endorsed in terms of [section 53](#), any person who claims that the patentee is, and was at the time of the endorsement, precluded by a contract in which the claimant is interested from granting licences under the patent, may apply to the registrar for cancellation of the endorsement.

(4) Where the registrar is satisfied, on an application under [subsection \(3\)](#), that the patentee is and was precluded as aforesaid, he shall cancel the endorsement, and thereupon the patentee shall pay to the registrar, within such period as may be prescribed, a sum equal to the balance of all renewal fees which would have been payable if the patent had not been endorsed and, if that sum is not paid within that period, the patent shall lapse at the expiry of that period.

(5) An application for the cancellation of the endorsement of a patent of addition shall be dealt with as an application for the cancellation of the endorsement of the patent for the main invention also, and an application for the cancellation of the endorsement of a patent in respect of which a patent of addition is in force shall be dealt with as an application for the cancellation of the endorsement of the patent of addition also.

(6) Where the endorsement of a patent is cancelled under this section, the rights and liabilities of the patentee shall thereafter be the same as if the endorsement had not been made.

of permitting the dependent patent to be worked and for no other purpose: Provided that the commissioner shall not grant such a licence unless—

- (a) the invention claimed in the dependent patent involves an important technical advance of considerable economic significance in relation to the invention claimed in the prior patent;
- (b) the proprietor of the dependent patent granted the proprietor of the prior patent on reasonable terms a cross-licence to use the invention claimed in the dependent patent; and

Restriction on recovery of damages for infringement.—(1) A patentee shall not be entitled to recover damages in respect of infringement of a patent from a defendant who proves that at the date of the infringement he was not aware, and had no reasonable means of making himself aware, of the existence of the patent, and the marking of an article with the word "patent" or "patented" or any word or words expressing or implying that a patent has been obtained for the article, stamped, engraved,

impressed on or otherwise applied to the article, shall not be deemed to constitute notice of the existence of the patent unless such word or words are accompanied by the number of the patent: Provided that nothing in this section shall affect any proceedings for an interdict.

(2) Any person who represents that any invention is patented, without such representation disclosing the number of the patent concerned, and from whom the number of such patent has been requested in writing by registered post by any other person unaware of such number, may not recover from such other person damages, or obtain an interdict against him, in respect of any infringement of such patent by such other person, committed during the period commencing with the representation and terminating two months after the date on which such other person was notified in writing by the first-mentioned person of the number of the patent concerned.

(3) Any person who, having made a request referred to in [subsection \(2\)](#), expends during the period referred to in that subsection any money, time or labour with a view to making, using, exercising, offering to dispose of, disposing of or importing the invention, may apply in the manner prescribed to the commissioner for compensation in respect of the money, time or labour reasonably so expended, and the commissioner may issue such order as he or she may deem fit.

(5) Where an amendment of a specification has been allowed under [section 51](#), the commissioner may in his discretion refuse to award damages in respect of any acts of infringement committed before that amendment was so allowed and, in exercising his discretion, the commissioner may take into consideration the conduct of the patentee in framing the specification and permitting it to remain in its unamended form.

- (a) If a counterclaim for the revocation of the patent has been made in the proceedings on the ground of the invalidity of any claim in the specification, the commissioner may postpone

the operation of any order issued thereon for such time as may be required to enable the patentee to effect any amendment of the specification pursuant to the conditions imposed by the commissioner, who may attach such other condition to any order to be issued on the counterclaim as he may deem fit; and

- (b) when the specification has been amended in terms of [paragraph \(a\)](#), the commissioner may, subject to such order as to costs as he may issue and as to the date from which damages shall be calculated, grant relief in respect of any claim which had, before the amendment, been found to be valid and infringed, and in exercising his discretion he may take into consideration the conduct of the patentee in inserting in the specification those claims which had been found, before amendment, to be invalid or permitting such claims to remain there.

- (a) that such person has applied in writing to the patentee for a written acknowledgement to the effect of the declaration claimed, and has furnished the patentee with full particulars of the process or article in question; and

by the plaintiff to be invalid: Provided that a circular, advertisement or communication addressed to any person, which comprises only a notification of the existence of a particular patent upon which the proprietor relies for protecting his interests shall not, by itself, be deemed to be a threat of proceedings for infringement.

(2) The defendant in any such proceedings may apply by way of a counterclaim in the proceedings for any relief to which he would be entitled in separate proceedings in respect of any infringement by the plaintiff of the patent to which the threat relates.
