

QuantifyYourFuture is excited to invite you to our first ever
VIRTUAL CAREER INNOVATION SHOWCASE

19 May 2021 | 13h00 to 19h00

This Showcase will focus on the range of opportunities for graduating and postgraduate students in Quantitative Sciences – with a focus on new and emerging careers.

What is QuantifyYourFuture?

Launched in March 2019 by leading employers, and hosted by SAGEA, QuantifyYourFuture exists to promote Management, Quantitative, Computational and Data Science career paths. Our goal is to support universities in promoting these qualifications by showcasing degree options at undergraduate and postgraduate levels and, ultimately, the range of career opportunities available to graduates.

What is the Virtual Career Innovation Showcase?

The Career Showcase will bring students from all over South Africa together for a day to experience, learn and share. You will spend time with our sponsors and partners - the agenda will include a keynote address, new and emerging trends in the field of Quantitative Sciences, and time to connect and discuss each participating organisation’s value propositions to study further and find out which opportunities exist when you are ready to enter the world of work.

This is the perfect opportunity to explore the world of Quants, specifically:

 What does a typical day look like in Quants?	 How are these skills used in Financial Services?	 What is the range of problems Quants typically solve?	 What could career development look like?	 What postgraduate degrees could one consider to advance in a Quants career?	 Who are the key employers in this domain?	 What is their unique employer proposition for graduates?
