

Office for Student Leadership Development

activate. motivate. mentor

Concept and purpose

The Office for Student Leadership Development provides a formal and institutionally integrated co-curriculum as well as research on graduate leadership development. The office, in partnership with faculties and other departments, designs programmes that are delivered through student-life colleges and communities.

We strive to meet the capacity-building needs of student leaders and to develop their full potential. The office provides channels for student pathways and signature development, while creating opportunities to enter into leadership positions and to pursue career development. As a result, these programmes enhance the academic performance and social integration of students.

Integrated framework for programmes:

The leadership development programmes are open to all undergraduate, graduate, and postgraduate students and can be categorised under two overarching themes, namely Leadership Development Programmes and Leadership Training Programmes, each consisting of two pillars.

● Leadership Development Programmes:.....

- **FutureLEAD:** Essential/Critical Leadership Development

The FutureLEAD Leadership Development Challenge (FLC) is a blended learning programme over four to seven months, engaging students on Blackboard and in panel discussions on and around understanding and using leadership in various situations and environments (studies, personal, community, and career).

- **AdvanceLEAD:** Advanced/Specialised Leadership Development

The Specialised Leadership Development Challenge entails selective leadership programmes aimed at high-achieving student leaders who show potential. They undergo advanced training and are channelled towards specialised leadership development programmes and virtual exchange opportunities, e.g. participation in national and international conferences, summits, and seminars. The annual Humanitarian Affairs Asia's University Students Leadership Symposium (USLS), as well as the Green Summit and Peace Summit can be mentioned as examples.

● Leadership Training Programmes:.....

- **KovsieLEAD:** Student Governance Training

Training of elected student governance structures and committees across campuses to be fully equipped and functional. This entails combined campus/structure programmes for e.g. student governance induction training and structure-specific training, inclusive of operational and portfolio-specific training, as well as inspirational sessions, e.g. SRC, associations and organisations' EC training, RC training, faculty-council training, etc.

- **PurposeLEAD:** Ad hoc/ Specific Training

Purposeful training for specific situations/ institutional goals/ preparation/ mobilisation in support of students and governance structures' specific needs, events and campaigns such as pre-election candidate training, accessibility and diversity training and a series of quarterly sessions on 'What Students Should Know' (WSSK), e.g. about protesting, human rights, gender-based violence, green themes, etc.
