To future proof your career, you will definitely find a career to choose from at the Faculty of Natural and Agricultural Sciences."

PROFESSOR DANIE VERMEULEN,

Dean for the Faculty of Natural and Agricultural Sciences.

Hello, I am...

This faculty is for the scientist at heart. If you are a curious person, love problem solving in the fields of Natural, Agricultural and Building Sciences, are a logical thinker, diligent, ambitious, and have a keen eye for detail, then the Faculty of Natural and Agricultural Sciences is just for you.

Our faculty can help you obtain a degree in more than a hundred programmes in various areas of expertise, including Mathematical Sciences, Physics and Chemistry, Geography, Geology, Biological Sciences, Computer Science and Informatics, Consumer Sciences, Building Sciences, and Agricultural Sciences. The choice of majors is unlimited!

Our faculty is the gateway to careers such as:

an architect, construction manager, a crop or animal farmer, an environmental conservationist, data scientist, microbiologist, astrophysicist, forensic scientist, actuarial scientist, engineer, and a geneticist

to name but a few. To future proof your career, you will definitely find a career to choose from at the Faculty of Natural and Agricultural Sciences.

With our wide selection of programmes, admission requirements differ from programme to programme. Most of our programmes require a minimum admission point of 32 and have specific requirements, such as an average of 60% for Physical Sciences, Mathematics, and Life Sciences. Remember, being a scientist is all about calculations and discoveries, and most of our programmes require Mathematics instead of Mathematical Literacy.

What if you do not meet these mainstream requirements? Do not despair! We offer Mathematics short courses where you might have missed the Maths requirement with one level, but where all other requirements for a course are met.

You also need to keep in mind that space in our faculty is limited; adhering to the application closing dates for the various programmes is thus critical.

FOR MORE INFORMATION

on the various programmes offered in the Faculty of Natural and Agricultural Sciences, contact Elfrieda Lötter at
