

BUSINESS & INFORMATION TECHNOLOGY

OBJECTIVES OF THE PROGRAMME

Business and Information Technology aims to provide participants with a practical approach to the management and assessment of the information and communication infrastructure. This aids in achieving business goals based on generally accepted best practices and international standards. This short learning programme will help participants in understanding the role of technology in business, assessing their own business environment and identifying the need for technology in the business environment and organisation.

LEARNING OUTCOMES

By the end of the programme, participants should be able to:

- Understand the role of technology in business
- Understand the impact of Information Technology (IT) in business processes
- Evaluate the purpose, impact and efficiency of IT for business growth
- Identifying, assessing, and managing IT and communications risks
- Review the risk management procedures relating to the use of technology including:
 - Legal Requirements
 - Policies and Procedures
- Understanding the impact of the Information and Communications Technology (ICT) law and the Protection of Personal Information (POPI) bill on the use of IT
- Evaluate and calculate the Total Cost of Ownership (TCO) in owning and using technology and outsourcing to vendors
- Understand the impact and cost of Cloud Computing and evaluating future trends in IT
